

The figure shows an ROC curve for pedestrian detection. The x-axis is labeled 'Recall' and ranges from 0.0 to 0.5. The y-axis is labeled 'Precision' and ranges from 0.0 to 1.0. The curve is a blue line that starts at (0, 1) and ends at approximately (0.54, 0.05). The curve is piecewise linear, with several sharp drops in precision as recall increases. A legend in the top right corner indicates 'pedestrian (AUC=0.5322)'.
